

About Us

Rubicon Engineering Corporation is a dynamic and fast growing environmental engineering firm located in Irvine, California. With a client list comprised of the fortune 500 companies, Rubicon is engaged in soil and ground water investigation/remediation projects, air quality studies, and environmental compliance throughout California and the western United States.

Job Description and Requirements

We currently have an opening for a geologist to perform field work, site characterization, design and implementation of remediation systems, ground water and contaminant transport modeling, and risk assessment. The candidate must be energetic, self-motivated with excellent written and oral communication skills. Candidate should be proficient with all Microsoft Office programs. Experience with AutoCAD and/or Arcview is preferred.

Salary and Benefits

Competitive salary is commensurate to experience. Rubicon Engineering Corporation offers an excellent benefits package including medical, dental, 401(k) matching, professional development compensation, opportunities to travel, and offers annual bonuses based on performance. This is an excellent opportunity to become a member of a technically advanced team with plenty of room to grow. To apply, please email your resume to hr@rubiconeng.com
